

Badotherm model BDT71-MP4 series are available as 56 mm dia. These gauges are used for gaseous and non-aggressive liquid media, applications include pressure measurement of car tyres ( heavy weight cars ), with special air tyre connection 8 mm.

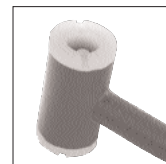

## automotive pressure gauge

**BDT71-MP4**

### mounting variations

- type A bottom connection, direct mounting
- type B panel mounting, clamp fixing, back connection
- type C surface mounting, bottom connection
- type D back connection, direct mounting
- type E panel mounting, back connection
- type F panel mounting, bottom connection

### technical specification model BDT71-MP4

<b>diameter</b>	<b>connection</b>	<b>window</b>	<b>ranges</b>
56 mm	air tyre 8 mm	plastic	0-10 bar
<b>casing</b>	<b>tube</b>	<b>movement</b>	<b>dial</b>
aluminium alloy	copper alloy	brass	aluminium
<b>bezel</b>	<b>socket</b>	<b>pointer</b>	<b>accuracy</b>
aluminium alloy	brass	aluminium	2.5% FSD

Note: protection class is IP40

### options and special executions at extra cost

dials	customized – i.e., non standard ranges or logos
certificates	calibration -; conformity -; material
manuals	installation and maintenance
restrictor	brass
soldering	silver soldered for steam applications
red pointer	on dial
dial	dual range bar+psi
